Conservation and working
lands
- Collaborative, Open Minded,
and Community Oriented
- Project Management
Experience
- Self-Starter

The Beaverhead Conservation District is seeking a Southwest Montana Sagebrush Partnership (SMSP) Invasive Annual Grass Coordinator. This unique position was created to accelerate cross boundary land stewardship in southwest Montana's sagebrush steppe. We would like to attract an experienced and capable conservation practitioner to the job – someone able to independently manage cross-organizational relationships, multiple simultaneous projects, and someone motivated to take on new and innovative approaches to address one of the fastest growing threats to our ecosystem. The SMSP focuses on four primary conservation issues affecting the sagebrush steppe landscape and overall watershed health: 1) conifer expansion, 2) wet meadow and riparian habitat degradation, 3) invasive annual grasses, and 4) wildlife movement barriers.
